

DISASTERLINK

A Curated Team of Local Responders

25
YEARS
OF IMPACT

When disaster strikes China, Give2Asia's network of local disaster response charities provides immediate relief and facilitates long-term recovery.

The Risks

China—including mainland China, Taiwan, and Hong Kong SAR—are all high-risk regions for natural disasters, each facing distinct yet significant threats. From seasonal floods and typhoons to earthquakes, landslides, and increasingly intense climate-related disasters linked to global warming, these regions highlight the urgent need for resilience in the face of escalating environmental risks.

The Solution

In 2022 Give2Asia launched **DisasterLink**—a network that has grown to include more than 50 trusted partners across 30+ locations at high risk or vulnerability for natural disasters. Each pre-positioned member is highly invested in the areas they serve, enabling them to help communities rebuild and recover long after the immediate crisis is over.

Give2Asia supports our DisasterLink network members by:

- **Building Capacity**
- **Sharing Knowledge**
- **Enabling Connections**

The Broader Network

After responding to more than 40 disaster events in Asia over 15 years and raising more than \$80M for local disaster response and recovery, the network has expanded to work on a global scale.

Through the Myriad Alliance for borderless giving, the DisasterLink network ensures that donors can instantly fund key local organizations that bear the brunt of any relief effort while giving those organizations the resources and space they need to focus on their most effective on-the-ground work.
